^{1/} State agriculture export estimates, except as noted, are from the Economic Research Service, USDA. They are based on national export data prorated by Oregon's portion of US production. This assumption will hold true for some commodities more than others. Industry estimates that roughly 40 percent of Oregon's production is exported out of the country and 80 percent is exported out of the state.

^{2/} Product of OASS cash receipts estimate and the Oregon Wheat Commission estimate of exported wheat (85 percent).

^{3/} From OASS nursery surveys.

^{4/} OSU sales prorated by export data from OASS 2001 Christmas Tree Survey.

^{5/} OASS price multiplied by export tonnage from Oregon Hazelnut Marketing Board.

^{6/} Fish & products are not included and are available on a Northwest Port basis from the US Department of Commerce. Includes confectioneries.
